Step 1: Right-click on an empty space on your desktop to create a new folder ("New" → "Folder"). Type in the patient name and click "Enter".

Step 2: Go to the patient's scan. Export from where the X-ray is located on the upper left corner. Select "Image" → "Export" → "Export Third Party DICOM".

Step 6: A window will appear with DICOM data. Confirm the .dcm files were exported correctly (there should be several hundred files).

Step 7: Return to your desktop and right-click on the patient's folder to send to a compressed folder ("Send to" \rightarrow "Compressed (zipped) folder"). A duplicate folder will be created with either a zipper or a blue "Z".

Note: If following a Dual Scan Protocol, zip scans individually and label accordingly (i.e., "Patient Scan" and "Denture Scan").

Step 8: Upload your case on glidewelldental.com, then click and log in to "My Account".

Note: Use Google Chrome when uploading your case; additionally, if you do not have an account, please contact us and we will set it up for you. Your scan can also be sent on a disc or USB drive via standard shipping methods if digital upload is not possible.
