Steps to Be Taken in Case Material is Released or Spilled

For high vapor concentration:
- Evacuate area, eliminate ignition sources, absorb spills with inert material, transfer to a suitable container for disposal.

Disposal Method: Do not dispose into sewer or drain, incinerate liquid in proper equipment. Dispose in accordance with all local, state and federal regulations.

Precautions to Be Taken in Handling and Storing:
- Store in a cool, dry place away from sources of ignition.
- Always use in accordance to package directions.

Other Precautions:

Section VIII - Control Measures

Respiratory Protection (Specify Type): When vapors exceed 10 PPM, a self-contained breathing apparatus should be used.

Ventilation:
- Local Exhaust Concentration: Below 100 PPM
- Special: None
- Mechanical (General): None
- Other: None

Protective Gloves:
- Impervious, neoprene type

Eye Protection:
- Safety goggles

Other Protective Clothing or Equipment:
- Eyewash

Work/Hygienic Practices:
- Always practice good personal hygiene.

Section I - Identifiers

Material Safety Data Sheet

IDENTITY (As Used on Label and List)
- Clearspint

Note: Blank spaces are not permitted. If any item is not applicable, or no information is available, the space must be marked to indicate that.

Section II - Hazardous Ingredients/Identity Information

Hazardous Components (Specify Chemical Identity; Common Name(s))
- Modified Ethyl Methacrylate Monomer
- Modified Ethyl Methacrylate Polymer

ACGIH: Other Limits Recommended % (optional)
Section III - Physical/Chemical Characteristics

- Boiling Point: 92°C
- Specific Gravity (H₂O = 1): 1.005
- Vapor Pressure (mm Hg): 760
- Melting Point: 70°C
- Vapor Density (AIR = 1): 1
- Evaporation Rate (Butyl Acetate = 1): N/A
- Solubility in Water: Negligible
- Appearance and Odor: Clear, pale yellow, mild odor

Section IV - Fire and Explosion Hazard Data

- Flash Point (Method Used): 71°C
- Flammable Limits: LEL N/A, UEL N/A
- Extinguishing Media: Dry chemical, carbon dioxide, dry chemicals, water
- Special Fire Fighting Procedures: Cool exposed material with cold water mist.
- Vapors are heavier than air and may travel to ignition source.
- Unusual Fire and Explosion Hazards: Sealed container exposed to elevated temperatures may rupture explosively due to polymerization. Vapors are heavier than air and may travel to ignition source.

Section V - Reactivity Data
