Frequently asked questions

What retainer designs can the ASTICS retainer be applied to?
ASTICS is applicable to soldered Hawley and wrap around designs. It can also be used in a spring aligner.

Can I adjust the ASTICS retainer?
Adjustments to ASTICS are possible through the U-loops.

Is the ASTICS retainer durable?
ASTICS is durable with many patients wearing the same retainer for more than two years.

How much does the ASTICS retainer cost?
This is lab dependent, but often ASTICS costs $20-$30 more than a traditional Hawley retainer.

With many patients wanting esthetic orthodontic treatment, the ASTICS retainer is the only retention solution that offers patients a choice of clear or fun colored labial bows. With greater choice, patient compliance is improved, resulting in maintenance of treatment results long term. Ask your lab today.

The ASTICS retainer is comparable in design to a traditional Hawley with the exception of the front labial bow, which is made of a state of the art multilayered composite material. This imparts superior strength and durability resulting in a long lasting retainer.

Supporting clinical evidence:
Chudasama et al. JCO Feb. 2009 "Esthetic modification of a Hawley Retainer using a Translucent Labial Bow."

For teens: ASTICS is the preferred retention solution amongst all age groups.

For adults: ASTICS is the preferred retention solution.

Supporting clinical evidence.
