

IMPROVE YOUR SMILE WITH VENEERS

No-prep porcelain veneers can give you the beautiful smile you've always wanted with no shots, no drilling and no pain! Your dentist will simply take impressions of your teeth, and the lab will fabricate razor-thin veneers to be placed on top of your natural teeth. No-prep veneers can be used to close spaces between teeth, reshape chipped or worn teeth, or whiten discolored smiles. Your dentist will determine if minimal or no-prep veneers are right for you. If you are a candidate, your smile makeover can be completed in as few as two appointments.

PORCELAIN VENEERS

Veneers

CLOSE SPACES

Raymond had a large space in the middle of his smile. His teeth were also chipped at the edges. His dentist decided he was a good candidate for no-prep veneers, which means he did not have to endure any shots, drilling or pain to correct his smile. The veneers were simply bonded into place, on top of his natural teeth. He was extremely happy with his new and improved smile.

RESHAPE TEETH

This 51-year-old female patient had excessive wear on her front teeth as a result of grinding. Also, the surfaces of her teeth were rough and irregular, making them prone to staining.

FIXED STAINED TEETH

This 43-year-old female patient wanted to change the shade and alignment of her smile. Veneers were needed on the bicuspids and first molars to correct the alignment and create a pleasing smile.
