BITE REGISTRATION GUIDE FOR SLEEP APPLIANCES

STEP 1: Take full-arch impressions of the maxilla and the mandible using VPS impression material.

STEP 3: With the patient in this protrusive position, inject bite registration material into the posterior opening of both quadrants.

STEP 2: Instruct the patient to move teeth into a comfortable protrusive position. If a protrusion gauge is not available, an edge-to-edge position is recommended.

STEP 4: Allow the material to fully set. Send the full-arch impressions, bite registration and a completed Rx to the lab for fabrication of the appliance.

All rush cases must be prescheduled by calling 800-944-7874 before the case is shipped.
Time of pickup and delivery may affect turnaround time.
