

MEET A GLIDEWELL.IO™ IN-OFFICE SOLUTION USER

What was the training experience like for you and your staff?

Glidewell flew my staff and I to California for a hands-on training course, which was wonderful! The fastmill.io™ is so user-friendly that all team members picked it up very quickly.

How have your patients reacted to same-day treatments?

The most rewarding aspect of using the mill was seeing how much my patients appreciated the added convenience of same-day treatments. The word-of-mouth advertising I get for free is impressive.

What is the benefit of being able to mill fully sintered materials?

The best thing is the fact that I don't need to use an oven. The restoration is ready for delivery right out of the mill. That saves so much time!

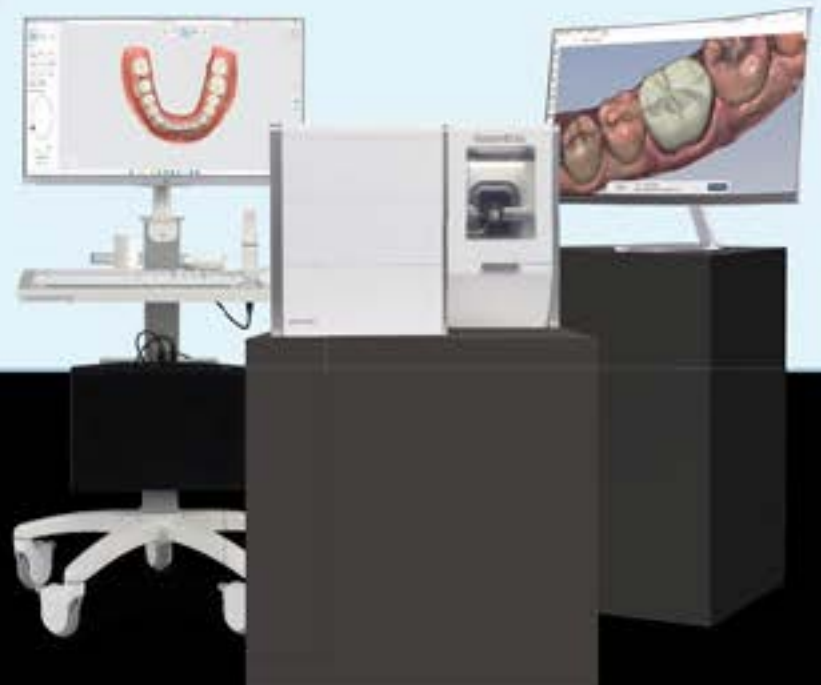

What made you choose glidewell.io versus other CAD/CAM systems on the market?

After comparing it with other mills out there, it just made the most sense. Knowing that I can call for real-time support and talk to a technician made all the difference. No other CAD/CAM system offers that level of help.
