

BruxZir® Solid Zirconia Crowns & Bridges

Patients: Print and take to your dentist

High-Strength Crown Options

BruxZir®
Solid Zirconia Crown

Gold Crown

Porcelain and
Metal Crown

When it's time for a new dental crown, many people want strong, esthetic restorations that look natural and don't break. Full-cast gold crowns & bridges are strong, but don't look at all like real teeth; porcelain metal restorations look better, but are prone to cracking and chipping.

Today, patients are turning to BruxZir Solid Zirconia for their crown & bridge restorations.

Dentists: Find an Authorized BruxZir Lab at www.bruxzir.com
